

"Strive not to be a success, but rather to be of value." Albert Einstein

## THE PAXTON ADVANTAGE

1-888-826-5580

JULY 2017

**PAXTON NOW HAS UNIBOARD EIR AVAILABLE**

### UNIBOARD TFL FEATURES THE LATEST IN TRENDS, MAKING THIS PREMIUM COLLECTION EASILY AHEAD OF THE PACK

**UNIBOARD'S** new synchronized Brushed Elm finish is a luxurious and deep brushed-wood texture. The matte-oiled surface replicates hours of hand polishing, emphasizing the wood's natural cathedral patterns and crossgrain features. The brushed 3D aspects of the finish creates a remarkable relief and reflects light beautifully in both horizontal and vertical applications. Brushed Elm can be applied on both sides of the panel thanks to Uniboard's revolutionary Woodprint Duo Technology™. The texture is seamlessly synchronized with the design on both sides of the decorative panel just as you would find on real hardwoods or veneers. Once again, Uniboard sets the standard in design and technology.

*My* **integra**® **dst**  
design • surface • match technology

MyIntegra by Uniboard is a state-of-the-art color matching program for distributors and manufacturers. Using the Integra dst exact match technology, you can now find co-product information for TFL, high pressure laminate, edgebanding, door components, moldings and more.

With the recent introduction of diverse colors, textures and cutting edge materials, building functional and on-trend kitchens, closets and bathrooms has never been easier.
